

Elina Razina

Frontend Developer (React, TypeScript, MobX)

+7 (911) 254-85-31 | razina_elina@mail.ru | Telegram: @Elina_Razina

MAX: max.ru/u/f9LHodD0cOKFGLDCQ1alx_ttaB8rTE_2M3b-uardY3H0HplAzQYinmfzHr8

Saint Petersburg, Russia | Russian citizenship and work authorization | Remote | Open to occasional business trips

PROFESSIONAL PROFILE

Frontend Developer with 9+ years of experience building and evolving complex single-page applications, including BIM, BI, and enterprise systems with high load and sophisticated domain logic.

I specialize in React 18+ and TypeScript, client-side architecture, scalable interfaces, performance optimization, RBAC, and gradual modernization of legacy code without interrupting product development.

EXPERIENCE

Jan 2025 - Present

1 yr 7 mos

Freelance

Remote

Mentor / Frontend Developer

- Mentor junior frontend developers in JavaScript, TypeScript, and React.
- Publish a professional engineering blog.
- Build web applications and websites with React, TypeScript, and Next.js.

Dec 2022 - Jul 2024

1 yr 8 mos

Samolet (Top-3 real estate developer in Russia)

Moscow / Remote

Senior Frontend Developer (React, TypeScript, MobX)

Project: A web application for construction automation that makes the entire construction process transparent.

Methodology: Scrum, two-week sprints. Distributed team of 2 frontend developers, 7 backend developers, 1 designer, 2 QA engineers, a Product Manager, and a Scrum Master.

Responsibilities

- Developed new features, reusable UI Kit components, business logic, and API integrations.
- Enhanced the UI Kit and built new components with Ant Design and Storybook from Figma designs.
- Performed project-level and cross-team code reviews.
- Participated in daily stand-ups, planning, grooming, and retrospectives.
- Mentored junior frontend developers and contributed to architecture decisions.
- Resolved production defects and improved application stability.

Key achievements

- Redesigned the full application, updating more than 1,000 components and related logic.
- Improved overall application performance.
- Optimized complex data tables by introducing virtualization.

Stack: React, TypeScript, MobX, styled-components, Ant Design, Samolet UI Kit, microfrontends, Module Federation, Webpack, Storybook, GitLab, Docker, CI/CD.

EXPERIENCE - DATAART

Jun 2019 - Nov 2022

DataArt (International software engineering company)

3 yrs 6 mos

Remote - projects for clients in the US and Europe

Frontend Developer (React, TypeScript, MobX, Redux)

Project 1: FinTech - Personal finance management

An application for monitoring personal finances.

- Designed the client-side architecture for authentication, transaction categorization, and PHP-based budget analytics.
- Integrated third-party banking REST APIs and synchronized complex application state.
- Built interactive expense charts and data visualizations with Chart.js.

Project 2: HRTech - Corporate ERP system

Built an MVP from the ground up with employee profiles, project management, and a recruiting funnel.

- Made core architecture decisions, including a modular structure and custom data hooks.
- Introduced strict TypeScript and ESLint rules, reducing production defects by 40%.

Project 3: CEO Dashboard - Internal analytics

Developed an admin panel with data-heavy tables, dashboards, and role-based access control (RBAC).

- Reduced initial load time by 50% through dynamic imports and caching.

Project 4: E-commerce - Food delivery service

Implemented the complete customer journey: catalog, cart, checkout, and order tracking.

- Built a fully responsive, mobile-first interface using SCSS and BEM.
- Implemented form validation and a multi-step checkout with React Hook Form.

Project 5: Meeting room booking system

Developed an SPA for managing resources across a university campus.

- Integrated REST APIs and implemented real-time availability.

EARLIER EXPERIENCE

Jun 2018 - Jun 2019

MTS (Russia's largest telecommunications operator)

1 yr 1 mo

Russia

Frontend Developer (Angular, TypeScript, JavaScript)

- Migrated a CRM and Service Desk SPA from AngularJS to Angular while maintaining uninterrupted operation for more than 2,000 support agents.
- Developed a subscriber account with analytics modules for call, internet, and SMS usage.
- Integrated MTS Bank services, including payment widgets and balance data.
- Set up CI/CD with Jenkins and automated build and deployment workflows.
- Conducted code reviews for a six-person team and mentored two interns.
- Reduced page load time by 35% after the migration.

Feb 2017 - May 2018

Technosila (Consumer electronics retail chain)

1 yr 4 mos

Saint Petersburg, Russia

Frontend Developer

- Developed an online store with product catalog, cart, and banking API integrations.
- Built responsive landing and promotional pages from Figma designs with pixel-perfect accuracy.
- Created cross-browser HTML email campaigns.
- Participated in code reviews and frontend architecture discussions.

EDUCATION

2018
Master's degree

Peter the Great St. Petersburg Polytechnic University
Innovation Studies, Applied Informatics

PROFESSIONAL DEVELOPMENT

React, 2022 - Result University

LANGUAGES

Russian: Native | English: C1 Advanced | German: A2 Elementary

CORE COMPETENCIES

- Frontend architecture: React, state management, API layer, modular structure
- Complex interfaces: data tables, forms, analytics, and billing modules
- Performance optimization: rendering, state, and network interactions
- RBAC implementation and UI-level access management
- Legacy code refactoring while preserving product stability
- Cross-functional Agile collaboration with analytics, backend, and QA teams

TECHNICAL SKILLS

React	TypeScript	JavaScript	Redux
MobX	Next.js	SPA	REST API
Webpack	Vite	HTML	CSS3
SCSS	styled-components	Ant Design	Tailwind CSS
Material UI	Figma	Storybook	React Hook Form
Chart.js	Microfrontends	Module Federation	Docker
Git	GitLab CI	Jenkins	CI/CD
Jest	ESLint	Code Review	Scrum
i18n	a11y	Performance optimization	Cursor
Claude Code			

ADDITIONAL INFORMATION

Recommendation

Vladislav Mironov - Project Manager, Samolet

Project access and NDA

Most of my commercial projects are enterprise applications with restricted access and are protected by NDAs. I cannot publish their source code or production interfaces. Instead, I provide interactive demo projects that demonstrate my frontend architecture, React, TypeScript, state management, complex UI, accessibility, and performance optimization skills.

Interactive demo: erazina.github.io/app/

About me

I have worked on enterprise products where UI stability, state management, RBAC, high data density, and gradual modernization of legacy code were critical. I am comfortable owning frontend architecture, building complex interfaces, optimizing performance, reviewing code, and mentoring engineers.

Primary stack: React (Hooks), TypeScript, JavaScript, REST API, MobX, Webpack, Vite, Jest, CI/CD, Docker, and Git.
